Executive Summary

Beaufort brings together some of the most experienced land, planning, and construction professionals in Greater London and the South East. Evolving our designs and approaches on an individual basis, ensuring each of our unique developments of family homes meets the expectations of modern life, enjoying a sense of uniqueness and sitting sensitively within its surrounding area.

This information memorandum provides you with a detailed explanation of the investment opportunity presented through the funding arm of Beaufort. Beaufort Property Invest.

Beaufort has deployed a "mezzanine finance" model to acquire the site in Chiddingstone Causeway. The former Dukes Cricket Ball factory. The Gross Development Value of the Scheme is £12,000,000.00. The purchase of the site is through a Special Purchase Vehicle - Beaufort (Causeway) Ltd A Company which is jointly owned by Beaufort Property Invest and Beaufort Construction Ltd.

Using A Mezzanine Finance model a maximum of 25% of the sites total Gross Development Value will be raised through investors with Beaufort Equity and Bank Lending making up the balance of funding to deliver the scheme. This approach will maximise the profits, improve cashflow of the project and maximise returns available to investors. Phase 1 involves the site acquisition, with Completion of the acquisition process taking place on Friday 2nd August 2024. Phase 2 of involves the demolition of the existing buildings, clearing and establishing of the site for development. Beaufort Property Invest will continue with the issue of Loan Notes /Property Bonds on the following terms completing the remaining Mezzanine element of funding.

Beaufort Property Invest will receive a 33% of the profits in order to repay investor returns. A security trustee has been appointed as an independent entity that sits between investors and the investment bond Most debt investments require an entity to act as the security trustee. The trustee must act impartially while representing the interests of the bond holders. The trustee takes a charge over the security assets, typically for the benefit of the investors and in conjunction with the debenture. This is filed at Companies House and prevents other parties getting security against the assets in question. Beaufort Construction also provides a corporate guarantee and investors will have a legal charge on the development upon completion of the round.

Beauforts Funding Strategy

A typical example of funding

The funding requirements of each site are unique, but let's take as an example, a project costing £10m in total. Once complete, the expected Gross Development Value ("GDV") is £12m which would provide a £2m profit or 20% of GDV (an industry standard).

Standard bank funding:

In this example, the bank provides a loan, secured by a first charge on the property, for 65% of the GDV (£7,800,000) and is first to get its money back.

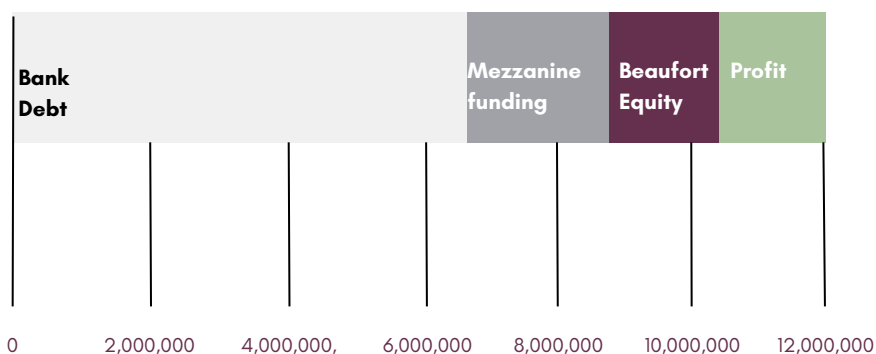

The bank receives a lower rate of return than the mezzanine funder, as it has a charge over the land and gets repaid first.

Mezzanine funding:

The gap between the funds lent by the bank and Beauforts's investment (£1,200,000) is filled by mezzanine funding. Mezzanine funding is repaid after the bank loan.

The Developer's equity:

The Developer, Beaufort, would invest the balance of any cash required (in this example £1,000,000) and would be last to be repaid. Their investment therefore carries the most risk.

Beauforts Development Strategy

At Beaufort Homes, we're not just building houses; we're creating communities where families can thrive, where sustainable living is a reality, and where the future is brighter for everyone.

Beaufort is currently developing a broad range of residential, sites in Surrey, Sussex and Kent in both urban and rural locations, featuring a range new-build designs that incorporating the latest in sustainable housing technology and "zero grid" energy dependencies.

Beaufort looks at each scheme on its individual merits, starting from scratch each time, on every element of design. When Beaufort purchases a site it balances a stringent risk analysis with the creative process to identify only profitable and deliverable schemes. Acorn sees the South East as the most positive region for investment, with excellent housing opportunities. These are driven by the demands for new houses, lifestyle changes, a growing population, improved transport links, excellent employment opportunities, good schools and beautiful landscapes.

Although Beauforts provides homes to all sectors of the community, Our market is dominated by families, down sizers, and retirement buyers who are the most financially-able and sustainable economic group of purchasers. Risk To Capital

Invested capital is at risk and you may not get back what you invest.

The Company, like all businesses, is vulnerable to financial difficulties and investing in unlisted Loan Notes involves significant risk of default and loss of capital.

Investment in Loan Notes of this nature is speculative and involves a higher degree of risk than other types of investment. Investments of this type are not suitable for all investors.

Non-Transferable and Illiquid Investment

The Loan Notes are not transferable or negotiable on the capital markets and no application will be made for the Loan Notes to be admitted for listing or trading on any market. It will not be possible to sell or realise the Loan Notes until they are repaid by the Issuer so please ensure you are fully aware of the risks involved and that you will not be able to cash in or sell your Loan Notes before their maturity date.

The Notes rank below employees, administrators but ahead of unsecured creditors. The Company also has the right to enter other debt arrangements, issue further Loan Notes and to grant other security over its assets provided it ranks equal to or behind the security in favour of Loan Note holders. This means that the Company's available assets may be spread around a larger group of secured creditors in a default or insolvency situation resulting in less being available to satisfy the claims of Note holders.

Fixed Interest Rate and Inflation

The Loan Note attract a fixed rate of interest and as such will not benefit from any subsequent increases in market interest rates. Accordingly, you should note that a rise in interest rates may adversely affect the relative returns that the Loan Notes offer. Further, inflation may reduce the real value of the returns over time.

The Security Trustee will not have any ability or responsibility to protect any monies in the accounts of the company which may have been set aside for payment of interest or the principal amount in respect of the Loan Notes. The Security Trustee has no role in the day to day management of the company and its personnel are not experts in the company's business. Accordingly, in the event that the security is enforced, there can be no guarantee that it will be possible to realise the assets for the same value as stated in the IM (or realise them at all in some cases).

Cancellation Rights

Investors will have seven (7) working days from the date they sign the application form to cancel an application to subscribe for Loan Notes. Investors should review the term and conditions of application carefully and seek professional advice from financial intermediaries authorised under FSMA to advise on investments of this type.

Regulatory Risk

Changes to existing laws or regulations or the creation of new laws or regulations may have an adverse effect on the company's business and could result in the company failing to generate sufficient returns to service the Loan Notes or redeem them in full (or at all).

Operational Risk

Operational factors may disrupt the Company's activities and result in increased internal costs, project delays, aborted projects and/or project cost increases. These risks may be related to and not limited to:

- The ability to retain key members of the Management Team (see 'Personnel' below).
- Failure to satisfy contract conditions, budget cost overruns and losses.

If one or more of these risks were to occur, the Company may not generate sufficient returns to service the Loan Notes or redeem them in full (or at all).

Property Market Risks

Fluctuations in the property market could affect the value of property purchased through bridging finance and joint venture agreements. Any negative fluctuations in the property market could affect the performance of the Company and its ability to repay Loan Note holders.
